Summary

Born in Tashkent, Uzbekistan; AL WIUT graduate. Second-year MIPT student at the School of Radio Engineering and Computer Technology. Proficient in C/C++ and Assembly language, with hands-on experience in microcontroller programming. Currently participating in the Media and Design Department at the School, bringing a fresh perspective to technical problem-solving.

EDUCATION AND COURSES

Moscow
Institute
of Physics
and
Technology

Department of Radio Engineering
and Computer Technology

2024 - present
MIPT

Introduction
to
industrial
programming
in C++

Courses with exam by K. Vladimirov

2025 - 2026
MIPT

PROJECTS

Buxtar

A portable, ESP32-based automated system for liquid mixing, featuring real-time sensor data processing and hardware control written in C++

<https://github.com/ELBEBACK/2nd-Course-Project-BUXTAR>

LIRS Cache

LIRS (Low Inter-reference Recency Set) and Belady's Ideal (Oracle) caching algorithms implementation in C++

<https://github.com/ELBEBACK/LIRS-Cache>

Derivative
calculator

A derivative calculator featuring tokenization, recursive parsing, differentiation, and simplification, including Abstract Syntax Tree (AST) graph visualization, all implemented in C

<https://github.com/ELBEBACK/Derivator>

ABOUT ME

Age: 19 years old

Interests: computer science, math, languages, art, architecture, design
